ABSTRACT

A [[D]]die set for forming cartridge cases (1; 101), comprising at least three support elements, i.e. an upper element (1100), middle element (1200) and bottom element (1300), which are connected together in the longitudinal direction by guide columns (1001) along which said upper support (1100) and bottom support (1300) are actuated displaceably relative to each other in predefined working sequences.
